Husqvarna Hiperfloor™

Bring out the strength in your floor!

Concrete floors deserve better treatment than just being walked on. An Husqvarna Hiperfloor™ will really make you appreciate the advantages of having concrete as an exposed floor surface. Dirty, grey floors are transformed into brilliant, easy-clean, environmentally-friendly and durable floors. It simply requires some thought.

The fact that concrete is a tough and durable material has been common knowledge for thousands of years. Ancient traces of the material dating back some 7000 years have been discovered and some of the most famous buildings from the Roman Empire, including the Pantheon, were built of concrete. Yet in spite of this, knowledge of making concrete was forgotten. It wasn't until the 17th century that concrete was rediscovered and once more became one of the most common construction materials of our time.

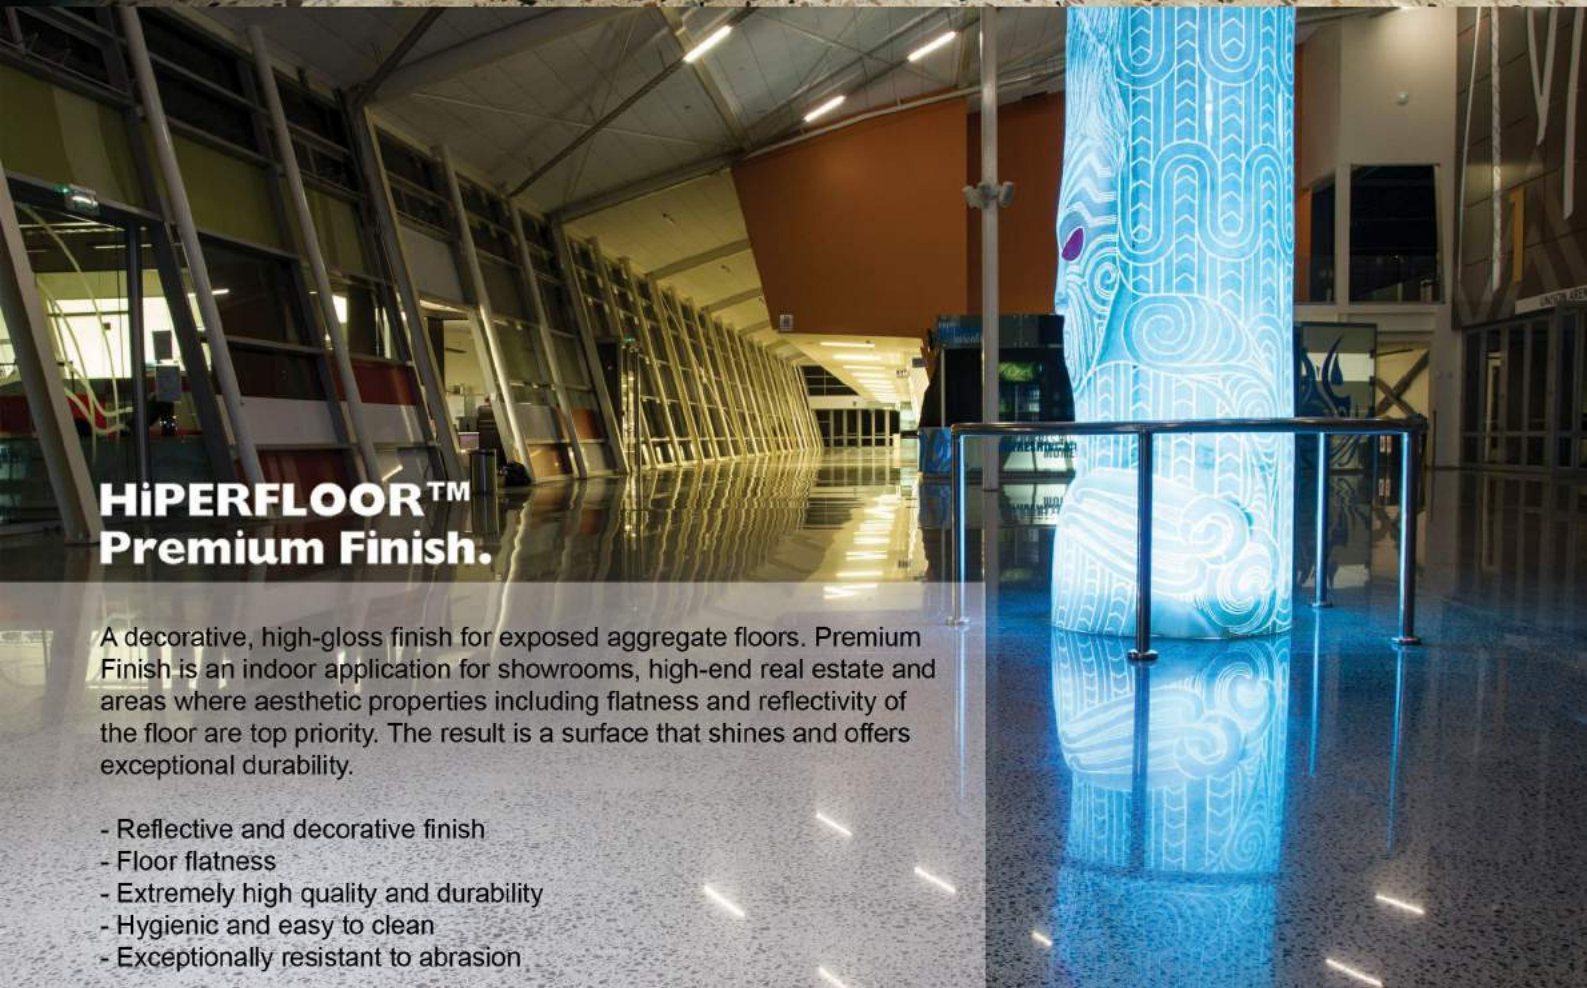

Husqvarna Hiperfloor™ is the revolutionary flooring concept with a technique that makes concrete more than just strong and hard - wearing. The technique is as simple as it is ingenious. Husqvarna's machines and diamond tools grind and polish concrete floors to remove the surface paste and expose the stronger concrete beneath. The result of this process is a stronger, more durable, shiny and beautiful floor. The environment and your bottom line both benefit too.

Durable concrete floor polishing.

HiPERFLOOR™ by Husqvarna is a complete concrete surface polishing system, which enhances the beauty, strength and abrasion resistance of concrete floors while reducing maintenance and costs.

HiPERFLOOR™ can radically transform a broad range of new and old concrete floors. By mechanically refining the already hard concrete surface through grinding, polishing and chemical treatments, we can bring virtually any surface to a whole new level of beauty, functionality and strength. With different specified processes, a flooring solution can be tailored to fit any requirement – aesthetics, floor flatness, gloss and price

HiPERFLOOR™ Premium Finish.

A decorative, high-gloss finish for exposed aggregate floors. Premium Finish is an indoor application for showrooms, high-end real estate and areas where aesthetic properties including flatness and reflectivity of the floor are top priority. The result is a surface that shines and offers exceptional durability.

- Reflective and decorative finish
- Floor flatness
- Extremely high quality and durability
- Hygienic and easy to clean
- Exceptionally resistant to abrasion

HIPERFLOOR™ Commercial Finish.

A medium-gloss finish for semi-exposed and low-exposed aggregate floors. Commercial Finish is an indoor application aimed at retail areas, shop fronts and indoor public spaces. The result is a floor that offers functionality and low maintenance but is still aesthetically pleasing.

- Easy to clean and maintain
- Resistant to wear and spills
- Abrasion-resistant
- Slip-resistant
- Minimal lifetime cost

HIPERFLOOR™ Industrial Finish.

A low-gloss finish customised for industrial floors. This process is primarily an indoor application targeting large areas such as warehouses and department stores where flooring functionality is of primary concern. The result is a hardwearing floor that offers a safer and cleaner environment.

- Minimal lifetime cost
- Withstands the toughest use
- Slip-resistant
- Resistant to spills, abrasion, oils and dusting
- Easy to clean

Husqvarna Hiperfloor™

More than just a beautiful finish

Beauty comes from below
Floors are an important part of everyday life, in both industrial areas and private residences. But as well as looking good, a floor needs to be functional too. That's why you're going to love Husqvarna Hiperfloor™.

The glossy concrete surface is not just aesthetically pleasing
– it brings a host of other benefits too.

lifespan make Husqvarna Hiperfloor™ the most lucrative investment option. The life cycle cost is about 80% less than for traditional flooring solutions. And using the Twister™ method of cleaning, you'll find your floor is simple, environmentally-friendly and cost-effective to maintain.

Strong floor, strong bottom line

Husqvarna Hiperfloor™ is an extremely economical option for all types of business activities. Compared with traditional methods for concrete floors or epoxy, for example, Husqvarna Hiperfloor™ offers unbeatable durability. The processed construction concrete has an unlimited lifespan, i.e. the same as the lifespan of the building. The initial investment is the same, or lower, than for traditional flooring solutions, but the low maintenance cost and the longer

Toward a better environment

Concrete is composed of pure natural materials. The coatings that are often applied to the concrete have an adverse effect on the environment. Husqvarna Hiperfloor™ uses as much as 30 times less energy than traditional flooring solutions.

A floor to suit all tastes

Husqvarna Hiperfloor™ is available as three different concepts. Industrial, Commercial, Premium. This means you can choose between a floor with a matt surface finish or a high gloss finish.
